

**Not all hardware companies  
are the same.**

**3v**

## Who we are.

3v is a Vieler Group Company specialising in the Vieler range which includes door hardware, washroom accessories, hardware for special needs and cloakroom fittings.

We supply a complete hardware package, everything you'll need to hang and operate a door plus a comprehensive range of office accessories.

3v also partner companies that specialise in Access Control and Automation guaranteeing a smooth interface between suppliers.

## What we do.

3v are Architectural Ironmongers. That means we understand our hardware from the inside out.

Because we are aware of all the latest legislation we can also deliver peace of mind (no extra charge.)

**Design matters**  
It's not just about pragmatics, how a product looks and feels is just as important. We enjoy contributing to the design process.

**Working with you**  
We specialise in tailoring packages to fit your budget so it's our job to help you to afford the right product.

3v supply an expert scheduling and specification service to help you through the process.

# 3v

#### Door hardware

The Vieler range of door hardware is one of the largest available, offering more than 25 styles of levers handles with complimentary pull handle designs. To complete the package 3v also supply: hinges, door closers, locks, cylinders, signage, push/kick plates, access control and automatic operators - in other words everything you need to hang and operate a door with the exception of the door itself.

#### Cloakroom Fittings

Include free standing coat stands, umbrella holders and a wide choice of coat hooks.

#### Washroom Accessories

Include toilet roll holders, toilet brush sets, soap dispensers, paper towel dispensers and paper towel bins.

#### Hardware For Persons With Special Needs

Include grab rails, cantilever grab rail and back rests for accessible wc's.

#### A family of products

For every Vieler lever handle there are complimentary accessories to complete the family.

#### Coherent Design

Only products that last the test of time and are truly easy to install can count as well designed. We believe that products which merely look good are simply not good enough.

#### Ecologically Sound

Our raw material, stainless steel, is readily recyclable the cornerstone of our environmental strategy is long product life - by far the most decisive factor when measuring ecological soundness.

We believe that significantly extending the useful life of our products makes far more environmental sense than simply reducing the quantities of raw materials used.
